WHY PORTABLE

Turn Any Room Into a Baptistry — In Ten Minutes

Not every church has space for a permanent installation. Not every ministry stays in one building. The Royal Spa Portable Baptistry was designed for exactly that reality — a heated, self-contained unit on locking casters that rolls through a standard 3-foot door and sets up wherever the congregation gathers.

Fill it with a garden hose, plug it into any standard 110V outlet, and the built-in titanium heater brings the water to a comfortable 96–102°F in 3–4 hours. When the ceremony is over, the included sump pump drains it in minutes. No plumbing. No renovation. No compromise on the experience.

**Heated Comfort**

Built-in 1,000W titanium heater with adjustable thermostat. Water stays 96–102°F — even outdoors in winter.

**Rolls on Wheels**

Industrial locking casters move it room to room — even when full. Fits through any standard 3' door.

**Ozone Purification**

Built-in ozone system keeps water clean with minimal chemical use. Fill it, use it, drain it.

**10-Minute Setup**

Garden hose fill, standard outlet power. No plumbing, no contractor, no permanent installation required.

**Built-In Circulation Pump and Heater**

1,000W titanium element with user-controlled thermostat. Insulated walls retain heat 3× longer than standard models.

Go Anywhere

At 33.5" wide, it rolls through standard doors on industrial locking casters. Moves full or empty.

Pastor Stays Dry

Narrow profile lets the minister stand outside the unit. Built-in seating, non-slip surface, and double steps for safe entry.

PORTABLE BAPTISTRY

Built in Indianapolis — ships nationwide

Capacity	65 gallons
Dimensions	34" W × 70.125" L × 36.5" H
